

# We are proud to be in The Sunday Times' 50 Best Green Companies 2008 UK

## Just how green are they?

More than 17,000 people completed our 52-point employee survey seeking their views on a series of statements relating to their company's environmental credentials. They registered their opinions on a seven-point scale ranging from "strongly disagree" to "strongly agree". The percentage scores in the selection of 12 tables below are the proportion attained of the maximum possible score had all employees strongly agreed with a given statement. The employee survey accounted for 30 per cent of a company's final ranking.

### Green to the core

Rank	Company	% score for the environment being at the heart of how your company operates
